

Bug Ticket

Title :User Creation Test Failure

Description:

The test for user creation with invalid data has failed. This suggests that the API is not correctly handling invalid data during user creation.

Steps to Reproduce :

1. Call the `POST /users` endpoint with invalid user data.
2. Observe the response.

Expected Behavior:

The API should return an error message indicating that the data is invalid.

Actual Behavior:

The API did not return the expected error message.

Priority:

High

Additional Information:

This issue was identified during routine API testing.
